## COACH ACCREDITATION FRAMEWORK

Netball Australia's Coach Accreditation Framework supports the development of coaches from beginner or club level through to international level. Coaches are able to progress along the six-tier accreditation pathway depending on their personal aspirations and ability.

Coaches complete a series of development activities in conjunction with their team coaching over a four-year period following their successful completion of a Netball Australia Coaching Accreditation course. Netball Australia recommends that all coaches who become accredited continue to advance their knowledge.

**Foundation:** A fully online course targeted primarily at beginner coaches, teachers, parents and NetSetGO coaches which outlines introductory coaching information and basic netball techniques.

**Development:** A blended learning program (online and face to face) targeted at Club, Association and Regional coaches and teachers aiming to further their netball knowledge. This course provides a good introduction to skill progression and fault detection and correction and allows coaches to practise their coaching skills at the half day face course after the initial learning online.

**Intermediate:** Targeted at those coaching Representative, Talent Identification and State League level. This course extends the learning around skill progression in preparation for the practical component of the Advanced course

**Advanced:** Targeted at coaches of Representative, Talent Identification and State League level who are developing advanced coaching principles and practices.

**Elite:** Targeted at those coaching at the highest level of State League, Australian Netball League and National Netball League, who are aspiring to be potential high performance coaches.

**High Performance:** Targeted at highest level State League, Australian Netball League and National Netball League coaches working in a head coach capacity and have overall responsibility for the delivery of a netball program within our high-performance system.
